### Document Body

Hi Jim-

I'm trying to figure out if I will need additional technical support for Treasure Island for property transfer documents. I understand that the FOST was already finalized, so I assume this will not be reviewed again by the BCT. Is this correct? At some sites "final" FOSTs or FOSETs still have an additional review period since they basically go on the shelf until the property is ready to transfer. Do you anticipate the need for any "OPS" evaluations? It seems that the groundwater remedies at TI (at the FS stage) are not meant to be long-term actions and that the Navy intends to complete the remediation before transferring overlying properties. Is this correct? These were my immediate questions, I may have more as the Navy's plan develops. Thanks.

-Christine
